

CONTENTS

Chapter 1. AGROCHEMISTRY AND SOIL SCIENCE

- E. Bakšienė, V. Janušienė.** Long - term experiments on calcareous sapropel in sandy loam Haplic Luvisol..... 3
- R. Repšienė, A.K. Pleševičienė, S. Čiuberkis.** The effect of manure rates on soil properties and productivity of agrocenosis 18
- A. Šlepetienė, I. Liaudanskienė.** Determination of humic and fulvic acids by *Multiskan MS* having adapted the programme *Genesis Lite* 31

Chapter 2. AGRICULTURE

- I. Kinderienė.** Energy and economic comparison of measures designed for erosion reduction on hilly soils 39
- A. Velykis, A. Satkus.** Factors of seedbed quality on heavy soils..... 53

Chapter 3. CROP PRODUCTION

- K. Rainys, V. Rudokas.** Potato tuber yield and quality as affected by growing conditions and varietal peculiarities 67
- O. Auškalnienė.** The effect of the growth regulator Trinexapac - ethyl and its mixtures on the biometrical indicators of winter wheat stems 81
- A. Kulikauskas, J. Sprainaitienė.** Productivity of oats varieties and lines in relation to the air temperature and precipitation distribution within the growing season 93
- J. Lapinskienė.** The impact of nitrogen fertilizer rates on fodder swede seed yield as affected by the planting method without mother roots 113

Chapter 4. GRASSLAND HUSBANDRY

E. Petraitytė. Competition between <i>Festulolium</i> and white clover in short-term pasture ecosystems	124
R. Skuodienė. The impact of temporary grasslands for cutting on the incidence of weeds in winter wheat crops grown after the temporary grasslands.....	125
V. Žemaitis. Productivity of <i>Festulolium</i> seed crops in relation to the cover crop, aftermath cutting time, age and nitrogen fertilization	139

Chapter 5. MICROBIOLOGY

L. Piaulokaitė - Motuzienė, D. Končius, E. Lapinskas. The occurrence of microorganisms as affected by different soil agrochemical properties.....	154
